TEN-YEAR INDEX

Volumes 1 through 10, 1969–1978

Author Index

Abbey, J., Andrews, C., Avigliano, K., Blossom, R., Bunke, B., Engberg, N., Halliburton, P., and Peterson, J. A pilot study: the control of shivering during hypothermia by a clinical nursing measure, 5:78
Abruzzi, L. A. See Clancey, J. K., 10:24
Adelstein, W. Brain stem injuries, 10:112
Alexander, E., Jr. Fractures of the odontoid process, 4:141
Andrews, C. See Abbey, J., 5:78
Apfelbaum, R. I., Kirk, M., and Terra, A. M. Microvascular decompression of the trigeminal nerve for the treatment of trigeminal neuralgia, 10:77
Avigliano, K. See Abbey, J., 5:78

Bader, D. C. H. Microtechnical nursing in neurosurgery, 7:22
Ball, M. Nurse or mortician? 10:66
Barnwell, M. L., and Sovie, M.D. Spotlight on neurosurgical nursing, 1:93
Bartol, G. Psychological needs of the spinal cord-injured person, 10:171
Basner, N. H. Wilson's disease: a rare genetic disorder, 8:144
Beckford, A. R., and Teter, A. A study of three patients with "Y" shunts, 9:128
Beeken, J. E. Body image changes in plegia, 10:20
Behrends, E. Superficial temporal artery anastomosis to the middle cerebral artery (STA-MCA), 8:113
Bell, M. Editorial, 8:1, 9:x, 9:137
Pre-operative teaching and post-operative care of the hypophysectomy patient, 4:165
Bell, M., Lorig, R. J., and Weiss, M. H. Nursing involvement with monitoring of ICP, 7:28
Bell, M., and Rekate, H. L. Cerebrospinal fluid dynamics, 10:46
The use of ventriculostomy in the neurosurgical patient, 9:150
Bell, M., and Weiss, M. H. Care of the patient for cordotomy, 5:27
Benedek, L. The psycho-social problems of neurosurgery patients and their families, 5:10
Berkovsky, D. Physiological effects of closed head injury, 4:125
Bettice, D. The cause of vomiting of tube feedings by neurosurgical patients, 3:93
Blossom, R. See Abbey, J., 5:78
Bond, D., and Young, R. Electrophrenic respiration in a patient with sleep-induced apnea, 9:118
Bond, J., and Morgenroth, D. Regional cerebral blood flow, 6:137
Boone, E. T., and Self, L. H. Nursing care of the paraplegic using an experimental electronic spinal neuroprosthesis to activate voiding, 4:61
Boyd, M. A. The patient with cervical spondylosis, 1:45
Brock, H. Carotid cavernous sinus fistula: the patient in the operating room, 6:58
Bucy, P. C. American association of neurological nurses and the pyramidal tract, 10:144
Guest editorial, 10:141
Letters to the editor, 3:79
Neurosurgical nursing, 6:42
The stroke patient with hemiplegia: etiology, pathology and prognosis, 2 (No. 2):25
The surgical treatment of abnormal involuntary movements, 2 (No. 1):31
Your own destinies, 1:23
Bunke, B. See Abbey, J., 5:78
Butterworth, G. A. Interfascicular autologous nerve grafts in the microsurgical repair of peripheral nerves, 9:63

Calvin, R. P. Continuous ventricular or lumbar subarachnoid drainage of cerebrospinal fluid, 9:12
Quiz
on computerized axial tomography, 9:162
on cranial nerve function, 10:33
on dexamethasone and dexamethasone sodium phosphate, 9:41
on neuroradiology, 8:174
on seizure disorders and electroencephalography, 9:90
Cantrell, C. M. Doesn't anyone hear me crying? 10:202
Carney, A. Doctor Wilder Penfield—the man the M.N.H. nurses remember, 8:169
Chalk, B. A. Anterior approach to cervical fractures, dislocations and herniated nucleus pulposus, 5:56
Surgical correction of cranial-facial anomalies, 7:123
Transsphenoidal hypophysectomy, 3:113
Chester, J. E. Neurosurgical instrumentation—a review and current trends, 6:62
Clancey, J. K., and Abruzzi, L. A. Nursing intervention of patients with pituitary tumors, 10:24
Clark, K. Health delivery services within neurosurgery, 2 (No. 1):15
Coleman, P. The problem of spasticity in the management of the spinal cord-injured patient and its treatment with special reference to percutaneous radiofrequency thermal selective sensory rhizotomy, 8:97
Trigeminal neuralgia: diagnosis and treatment with special

reference to percutaneous radiofrequency rhizotomy, 7:91
Coveney, R. Neurosurgical research: a challenge to the nurse, 5:15
Craton, M. E. National nursing organizations meet: a report to the membership, 5:7
The next step (Presidential address), 4:3

Davie, J. C. See Marcus, A. J., 2 (No. 1):41
Dohrmann, G. J., and Wick, K. M. Research in experimental spinal cord trauma: past and present. A brief review, 4:115
Duggins, E. L., LeRoy, P. L., and Goloskov, J. Pneumatic applanation as a noninvasive means of intraventricular pressure management, 10:156
Dunbar, N. Percutaneous stimulation in the treatment of acute and chronic pain, 8:105
Dunn, J. See Jackson, F. E., 6:72; 7:14

Edmonds, V. E., Tator, C. H., and Sandler, A. N. The role of laboratory research in the clinical treatment of acute spinal cord injuries, 8:18
Ehni, G. E. The surgical nurse and neurological surgery, 6:7
Eller, T. See Jackson, F. E., 6:72
Engberg, N. See Abbey, J., 5:78
Ewy, V., and Minckley, B. The anesthesiologist's view of elective craniotomy, 9:58

Finneson, B. E. Nonsurgical treatment of low back pain, 9:54
Fiore, M. A. The nurse practitioner, 9:106
The uniqueness of a neurosurgical nurse (Presidential address), 3:9
Fode, N. C., Laws, E. R., Jr., and Sharbrough, F. W., 10:130
Foldes, M. S., and Woods, M. E. Crisis intervention: the patient with interruption of spinal cord integrity, 7:72
Fozzard, E. L. The psychosexual needs of the neurologically disabled, 10:92

Geist, B. L. See Smith, J., 10:102
Gifford, R. R. M. Neurological status sheet for nurses, 4:173
Gifford, R. R. M., and Plaut, M. R. Abnormal respiratory patterns in the comatose patient caused by intracranial dysfunction, 7:57
On describing altered states of consciousness, 5:18
Ginnity, S. W. Assessment of cervical cord trauma by the nurse practitioner, 10:193
Papilledema and pseudopapilledema: an update for the nurse practitioner, 10:74
Gitomer, M. Presidential address, 7:10
Glass, S. J. Nursing care of the neurosurgical patient: head injuries, 5:49
Nursing care of the paralyzed patient, 2 (No. 1):25
Goloskov, J. W. See Duggins, E. L., 10:156
Goloskov, J. W., and LeRoy, P. L. A new method for managing extracellular fluid accumulations in central nervous system disorders, 8:53
The evolving role of the nurse and the neurosurgical physician's assistant in the treatment of intractable pain states, 7:107
The role of the nurse in quantitative intracranial pressure determinations, 10:17
Gonzalez, D. E. Receptive-expressive aphasia—does it really exist? 9:122
Green, J. Air instruments and the neurosurgical nurse, 3:35
Greenwood, J., Jr. The evolution of neurosurgery and the neurosurgical nurse, 5:39
Groteboer, J. Stroke, carotid endarterectomy, and the neurosurgeon, 10:52

Hall, P. V. See Hight, B., 8:28

Electroencephalography and seizure disorders, 9:90
Electronic neuroprosthesis, in paraplegia to activate voiding, 4:61
Embolization
in treatment of cerebral arteriovenous malformations, 9:152
role in arteriovenous malformations of the brain, 8:132
Endarterectomy, carotid, following stroke, 10:52
Epilepsy
surgical treatment of, 8:155
temporal lobe, 8:89, 10:130

Fistula, carotid cavernous sinus, 8:23
Fluid accumulations, extracellular, in central nervous system disorders, 8:53
Fractures
cervical
diagnosis, 5:56
treatment, conservative and operative, 5:56
odontoid process
diagnosis, 4:141
treatment, 4:141
From the Editor's desk, 9:133, 9:137

Gliomas, malignant, 6:109
Group practice, nurse coordinator, 4:45
Guillain-Barré syndrome, patient care and case findings, 6:97

Head injury
changes in blood chemistry, 4:9
classifications, 4:9, 5:49
closed, physiological effects, 4:125
complications, 5:49
diagnostic evaluation, 4:9
in children, 9:95
management, 4:9, 5:49
nursing care, 1:75, 5:49
Health delivery services within neurosurgery, 2 (No. 1):15
Hemiplegia, in stroke patient, etiology, pathology, and prognosis, 2 (No. 2):25
History taking, art of, 2 (No. 2):5
Hospital-community
emergency care of neurosurgical patient in, 8:11
improving continuity of community between, 2 (No. 2):19
Huntington's chorea, clinical, genetic, and social aspects of, 3:27
Hydantoins, quiz on, 10:204
Hydrocephalus in children, shunt therapy, complications, 2 (No. 2):41
Hypophysectomy
craniotomy, 1:61
cryosurgical technique, 1:61
nurse's role, 1:61
postoperative care, 4:165
preoperative teaching, 4:165
transsphenoidal, 3:113
Hypothermia
clinical applications, 4:33
control of shivering during, 5:78
local, in treatment of acute spinal cord injury, 10:95
nursing concepts, 4:33

Implants, metals for, 3:123
Infections, postoperative, in neurosurgery, 9:84
Inpatient neurosurgical unit, innovations by nursing staff, 9:111
Intracranial aneurysm. See Aneurysm
Intracranial dysfunction, abnormal respiratory patterns in the comatose patient, 7:57
Intracranial internal carotid artery saphenous vein bypass, 6:132
Intracranial lesions, water and electrolyte metabolism associated with, 9:165
Intracranial pressure
determination of, role of nurse in, 10:17
monitoring of, by nurses, 7:28, 9:34
nursing assessments of, 6:27
Intracranial pressure waves, symptoms caused by, 9:144
Intracranial volume, techniques for reduction of, 8:85
Intraventricular pressure measurement by pneumatic applanation, 10:156
Involuntary movements, abnormal etiology and surgical treatment of, 2 (No. 1):31

Keynote address, AANN
George B. Jacobs, 8:2
Pauline M. McGibbon, 9:124

Membership roster, 1976, AANN, 8:66
Meningioma, experience of nurse as patient, 10:202
Metals for neurosurgical implants, 3:123
Microneurosurgery, operating room nurse's role, 3:51
Microscope, surgical binocular, design and optical principles, 10:1
Microtechnical nursing, 7:22
Microvascular decompression of the trigeminal nerve in trigeminal neuralgia, 10:77
Model, educational, for professional nurse, 4:93
Motor neuron disease, 5:21
Multiple sclerosis, transcutaneous electrical stimulation in, 8:125
Myelodysplasia, 8:28
Myelography, 4:83
water-soluble, nurse's changing role in, 10:189

Myelomeningocele, care of child with, 6:122

Neurological assessment for nurses, part of the nursing process, 10:13
Neurological examination, nursing assessment, 9:23
Neurological status sheet for nurses, 4:173
Neuroprosthesis, electronic, in paraplegia to activate voiding, 4:61
Neuroradiology
  quiz on, 8:174
  sub-specialty, 4:83
Neurosurgery
  evolution of, 5:39
  health delivery services within, 2(No. 1):15
  psycho-social problems of patients and their families, 5:10
Neurosurgical care
  concept of, in a general hospital, 7:82
  of the myelomeningocele child and his family, 6:122
Neurosurgical group practice, nurse coordinator, 4:45
Neurosurgical instruments, review and current trends in, 6:62
Neurosurgical intermediate care unit (Methodist Hospital, Houston), 1:101
Neurosurgical nurse
  and air instruments, 3:35
  and the computer, 7:102
  and the law, 3:83
  as a departmental assistant, 7:99
  as psychiatric liaison in management of chronic pain, 10:160
  evolution of, 5:39
  evolving role of, in treatment of intractable pain, 7:107
  responsibilities of, in arterial and intracranial pressure monitoring, 7:116
  role in helping both patient and family, 6:85
  role in myelography, 10:189
  role in quantitative intracranial pressure determinations, 10:17
Neurosurgical nursing
  as a specialty, 3:9
  changing role, 2 (No. 1):7
  clinical specialist, 5:30
  direction and purposes of, 6:39
  guest editorial, 10:141
  special training and abilities, and need of recognition for, 6:42
  spotlight on, 1:93
  trends in, 1:31, 3:83
  yesterday, today, and tomorrow, 1:15
  your destiny? 1:23
Neurosurgical patient
  arterial blood gas analysis in management of, 9:29
  emergency care of, 8:11
  psycho-social problems of, 5:10
  pulmonary complications in, 9:102
  "the one that mattered," 6:127
  use of ventriculostomy in, 9:150
  with carotid cavernous sinus fistula, 6:58
  with Guillain-Barré syndrome, 6:97
Neurosurgical research
  current activities, 5:15
  nurse's challenge, 5:15
Neurosurgical service for dying, 5:2
Nucleus pulposus, herniated, cervical, diagnosis and treatment, 5:56
Nurse
  coordinator, in neurosurgical group practice, 4:45
  operating room, role in microneurosurgery, 3:51
  or mortician? 10:66
  practitioner, 9:106
  professional, educational model for, 4:93
Nursing and social work services, integration of, 9:5
Nursing establishment, and your own destinies, 1:23
Nursing organizations, national meeting, 5:7

Obituary, Dr. Wilder Penfield, 8:169
Odontoid process, fractures, 4:141
Onocology, clinical specialist in, 10:176
Operating room nurse, role in microneurosurgery, 3:51

Pain
  chronic, and neurosurgical nurse as psychiatric liaison, 10:160
  intractable, transcutaneous electrical stimulation for, 7:87
  low back, nonsurgical treatment of, 9:54
  percutaneous stimulation in treatment of, 8:105
  treatment by cutaneous afferent stimulation, 8:80
Papilledema and pseudopapilledema, 10:74
Paralysis; complications, nursing care, and rehabilitation, 2 (No. 1):25
Paraplegia
  progressive, and scoliosis, 8:28
  social and psychological implications, 5:63
  voiding, activation through nursing care, 4:61
Parkinson's disease, symptoms, medication, surgical treatment, pre- and postoperative care, 2 (No. 1):41
Patient
  alcoholic, cerebral trauma in, 10:121
  craniotomy
    evaluation and care of, 10:102
    nursing care in the operating room, 10:49
  dying, and clinical specialist in oncology, 10:176
  neurologically disabled, psychosexual needs of, 10:92
  spinal cord injured
    and human sexuality, 10:125
    nursing needs, 10:29
    psychological needs of, 10:171
Pediatric neurosurgery, blood loss, 2: (No. 2):31
Percutaneous radiofrequency rhizotomy, in treatment of trigeminal neuralgia, 7:91
Percutaneous stimulation
  in treatment of pain, 8:105
  temporary of spinal cord, 9:67
Peripheral nerves, microsurgical repair of, 9:63
Pharmacology of analgesics, 10:180
Pituitary gland
  anatomy and physiology, 1:61
  and acromegaly, 1:61
  endocrine studies, 1:61
  hypophysectomy

by craniotomy, 1:61
by cryosurgical technique, 1:61
Pituitary tumors, nursing intervention of patients with, 10:24
Plegia, body image changes in, 10:20
Pneumoencephalography, 4:83
Positioning for dorsal and lumbar surgery, 3:143
Pregnancy, arteriovenous malformation of brain in, 6:72
Presidential address
Agnes M. Marshall, 2 (No. 1):7
Barbara Therrien, 1:15
Kathleen Redelman, 10:41
Kathy Hausman, 10:44
Margaret Fiore, 3:9
Mary E. Craton, 4:3
Mildred Gitomer, 7:10
Pat Wimberly, 6:3
Patricia A. Rauch, 9:51
Rosanne Wille, 8:9
Sarah Rosenburgh, 5:37
Professional nurse, educational model for, 4:93
Pseudotumor cerebri, nursing care of patient with, 9:147
Psychological and social implications of paraplegia, 5:63
Psychosexual needs of neurologically disabled, 10:92
Psycho-social problems of neurosurgery patients and their families, 5:10
Pulmonary complications in neurosurgical patients, 9:102
Pyramidal tract and the neurosurgical nurse, 10:144

Quiz
on computerized axial tomography 9:162
on cranial nerve function, 10:33
on dexamethasone and dexamethasone sodium phosphate, 9:41
on neuroradiology, 8:174
on seizure disorders and electroencephalography, 9:90
on the hydantoins, 10:204

Regional cerebral blood flow, 6:137
Rehabilitation of spine-injured persons, teamwork in, 6:14
Respiration, chemoreceptors of, 10:68
Respiratory patterns, abnormal, caused by intracranial dysfunction, 7:57
Reticular formation, an anatomical review, 9:157
Rhizotomy
in treatment of spinal cord injuries, 8:97
percutaneous radiofrequency, in treatment of trigeminal neuralgia, 7:91
use of to alleviate low back pain, 6:92

Sciatic nerve injuries from injections, prevention, 3:45
Scoliosis and progressive paraplegia, 8:28
Seizure disorders and electroencephalography, 9:90
Sexuality and the spinal cord injured, 10:125
Shivering, control of, during hypothermia, 5:78
Shock, recognition and response of brain to, 8:37
Shunt therapy for hydrocephalus in children, 2 (No. 2):41
Sleep-induced apnea, electrophrenic respiration in, 9:118
Social and psychological implications of paraplegia, 5:63
Social work services and nursing, integration of, 9:5
Spinal cord injuries
acute, 7:1
autonomic hyperreflexia in, 9:1
neurosurgical nurse's role in, 7:72
nursing needs of patients with, 10:29
psychological aspects of, 10:171
rehabilitation of persons with, 6:14
research and treatment, 4:49, 4:115
role of laboratory research in treatment, 8:18
team approach in acute phase of, 10:117
treatment by local hypothermia, 10:95
treatment with percutaneous radiofrequency thermal selective sensory rhizotomy, 8:97
Spinal cord, temporary percutaneous stimulation of, 9:67
Spine, odontoid process fractures of, 4:141
Spondylosis, cervical
nurse's role, 1:45
symptoms, diagnosis, and treatment, 1:45
Stereotaxic radiofrequency coagulation, for trigeminal neuralgia, 4:75
Stroke, carotid endarterectomy, and the neurosurgeon, 10:52
Stroke, hemiplegia, etiology, pathology, and prognosis in, 2 (No. 2):25
Stroke unit, new concept, 3:153
Surgery
dorsal and lumbar, positioning for, 3:143
for cranial-facial anomalies, 7:123
for temporal lobe epilepsy, assessment of patients, 10:130
lumbar
and comprehensive nursing care, 10:86
positioning for, 3:143
neurological, nurse's role in, 8:77
transsphenoidal pituitary, 8:45
Surgical binocular microscope, design and optical principles of, 10:1
Surgical nurse
acute spinal injury and, 7:1
neurological surgery and, 6:7
